

What's New in EViews

Estimation • Forecasting • Statistical Analysis
Graphics • Data Management • Simulation

Econometrics & Statistics

Estimation

- MIDAS & Nowcasting (+)
- Autoregressive Distributed Lag regression (ARDL) with automatic lag selection
- Pooled mean group estimation of panel data ARDL models
- ML and GLS ARMA estimation
- ARFIMA estimation
- Threshold regression
- FIML Estimation with Covariance Restrictions (+)
- A new optimization engine

Forecasting

- Automatic ARIMA forecasting of a series
- Forecast averaging
- Forecast evaluation and combination testing
- VAR Forecasting
- Diebold-Mariano Test (+)

Testing & Diagnostics

- Unit root tests with a structural break
- Cross-section dependence tests

EViews ... It's About Time

continued on next page

Powerful analytics, ease-of-use, and flexibility - that's EViews -

Graphs, Tables & Spools

- New mixed graph types
- Graph pan and zoom
- Multi-graph viewing slideshow
- Rectangle and ellipse drawing
- Arrow, rectangle, and ellipse data-based anchoring
- Tables, graphs, and spools may now be saved in LaTeX format

Models

- Model print view (+)
- Model scenario descriptions (+)
- Model scenario view (+)
- Model password protection (+)
- Contextual equation search and selection (+)

Programming Support

- Saving/Retrieving program variables to text files on the hard drive (+)

Interface

- Command capture from the interactive interface
- Dockable command and capture window interface
- Database and workfile object preview
- New interactive view of group members (+)

Data Handling

- Enhanced import and linking of data
- Powerful new FRED database interface
- Dated data table template support for saving and importing customized settings
- New frequency conversion methods.
- Automatic description labeling for data generated through EViews procedures

(+) Features available in EViews 9.5
